

Zippa Lite BSA

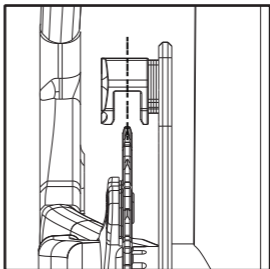

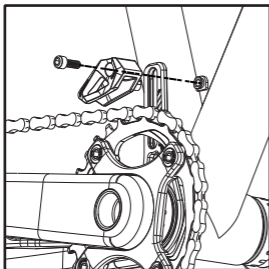

Step 1:

Remove the crankset and external BB cup on the right side. Replace a 2.5mm BB spacer with Zippa Lite chain guide. Adjust the Zippa Lite to desired angle then tighten the BB cup.

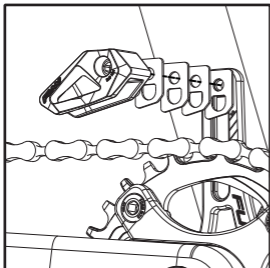

Step 2:

After installing the crankset, install the top guide by screwing it into the mounting plate. Check to see if the top guide and chain are aligned properly. If the alignment is good skip to step 4.

Step 3:

To achieve proper chain alignment, use the supplied spacers between the top guide and the mounting plate and tighten the fixing screw. Use the longer screw when more than one spacer is used.

Step 4:

Adjust the height of the top guide so that it is as low as possible without making contact with the chain, chain ring or chain ring bolts.
